FlagOS Lab Assistant Quick Start Guide

Note: The FlagOS Lab Assistant is an experimental version.

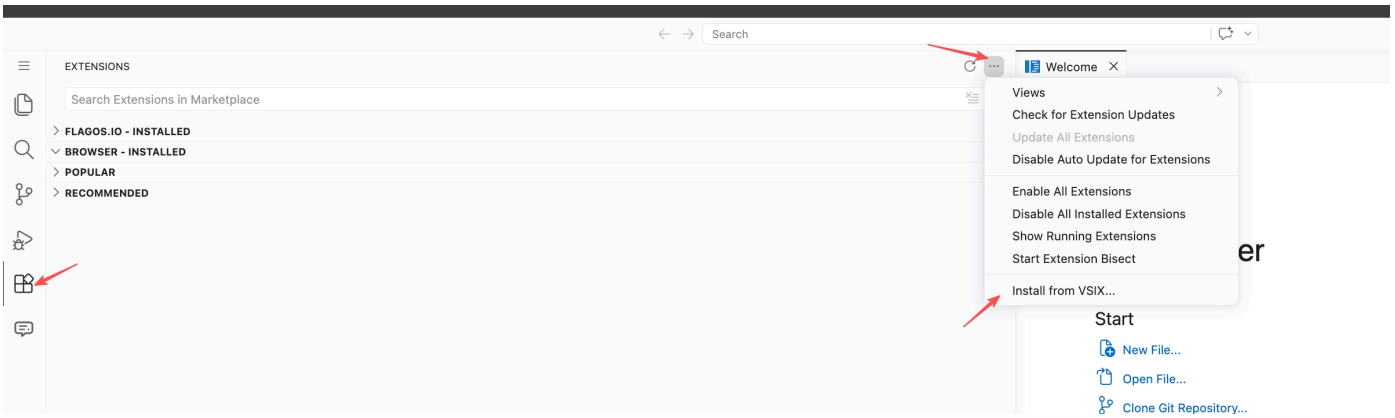

1. Save the following file to a local folder on your computer.

2. Click **Show Local** to upload the above file to the online lab.

3. Click the **Extensions** button, and then click the **View and More Actions...** button. Select **Install from VSIX...** in the drop-down menu and point it to the .vsix file above.

4. When the **Chat** button appears below the **Extensions** button, the installation is complete. Click the **Chat** button to open the assistant documentation. Click **EN** in the top right corner to switch to English. You can switch documents on the right side and ask AI questions about the document content in the dialog box below.
